

ASSIGNMENT – 3

DATE: 29-03.2023

1. Create an Online Bookstore/Library website. The Online Store should have the following features
 - a. Home page should have 2 frames
 - i. top frame where bookstore name and search icon are available.
 - ii. left frame – list of links. If not logged in list of links are Home, About Us, Login, Register/Sign up, Contact Us. If logged in depends on the user logged in.
 - b. Login page and SignUp Page – For now login username can be user, owner and admin (Later can be altered to email id of the user when we develop this).
 - i. For signup page, form should be displayed that should collect name, address, organization, email, phone, language, DOB, Genre.
 - c. For User – The options for left frame available are
 - i. Home – to return to home page which displays something like a dashboard
 - ii. buy books – shows a list of books available for purchase with an option to add it to the cart
 - iii. borrow books – shows a list of books available for borrowing with a link to add it to cart for borrowing
 - iv. view books – shows the history of books that are purchased and borrowed by the user and if the book is borrowed, it shows the return date and the fine if any.
 - v. Edit profile page – to edit the user details like address, phone number, etc.
 - vi. Once logged in top frame should display the user name and logout button on top right corner.

Sample Home Page
